

## SUMMARY:

- Static small Venous Leg Ulcer 6 months
- Healed week 4

## PATIENT INFORMATION:

Patient VS has a history of venous ulceration. VS current ulcer was static in healing and had been present for 6 months. As a consequence it needed an intervention to instigate healing of the remaining ulcer. Weekly compression bandages had been applied for the 6 months treatment

On commencing cycloidal vibration therapy (VIBRO-PULSE™) VS had a small superficial ulcer on right lateral gaiter 0.75cm sq.

**Cycloidal Vibration Therapy (VIBRO-PULSE™):** started 3 x a day for 30 minutes per treatment. VS self administered the treatment.

**DRESSINGS / BANDAGING:** VS continued to receive weekly compression bandaging.

### WEEK 4 of VIBRO-PULSE™:

**WOUND:** The leg ulcer had healed.

**OEDEMA:** It was noted that the volume of the leg had reduced just over 10%

Right leg before and after 4 weeks VIBRO-PULSE therapy
